DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 3/19/07 has been entered.
2. The drawings were received on 3/19/07. These drawings are acceptable.

Claim Objections

3. Claims 1-13 are objected to because of the following informalities: the limitations recited in claim 1, lines 4-8, do not appear to be an apparatus type limitations. The claim, as per the preamble is directed to a system. Accordingly, line 4, should start by reciting the actual hardware of the system configured to generate the "encoded time signal". In addition is the recitation "encoded time signal" in the preamble the same as the recitation "generated encoded time signal", recited in the claim body? If so, the body of the claim should be amended in such a way as to be consistent with the preamble or vice versa. A goal to "sampling of analog signal inputs"/"synchronous operation" is set forth in the preamble, however, the body of the claim does not include

Art Unit: 2611

any limitation(s) to "synchronous sampling of analog inputs" or "synchronous operation".

The same comment applies to claims 9 and 12, as appropriate. In addition, "IRIG-B" should be expanded, as recited in claims 2, 10 and 13. Claim 7, line 1, "code" should be deleted. Claim 12, lines 11-14, after "sampling", "synchronization" should be inserted, respectively, so as to be consistent with the specification. Note that any claim whose base claim is objected, is likewise objected. Appropriate correction is required.

Specification

4. The disclosure is objected to because of the following informalities: paragraph 20, refers to "element "46" as a numerically controlled **counter** (NCO). However, NCO is known in the art as "Numerically controlled **oscillator**".

Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-13 would be allowable if amended to overcome the objection set forth above.

Conclusion

6. This application is in condition for allowance except for the formal matters noted above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
